DONPCRANES was founded in 2009, with its administrative and sales centers located in Shanghai. Its production and manufacturing bases are located in Changzhou and Yancheng, Jiangsu Province, with convenient and fast transportation. It covers a total area of 110 acres. DONPCRANES mainly adheres to and continues the advanced technology and manufacturing process of European material handling equipment, focusing on the technical research and development, innovation, and update of European material handling equipment and its supporting equipment, as well as the manufacturing of products Assembly and sales.

No. **01**

Products

Single girder crane
Max. 20t

Double Hoists crane
Max. 12.5+12.5

Double girder crane
Max. 200t

Underrunning crane
Max.10t

Double girder Gantry crane
Max.200t

Semi-Gantry crane
Max.20t

Clamp with Telescopic sleeve

Vacuum Lifter

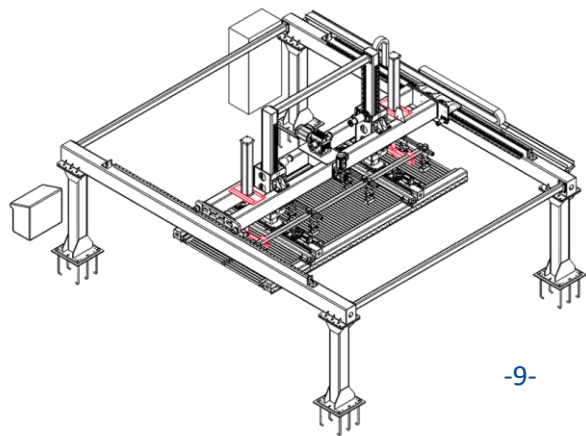

Truss manipulator

Part cutting piece sorting truss manipulator

Two Z-axis linkage work

- (1) Servo motors are used for synchronous control
- (2) Collision avoidance detection of two Y-axis middle laser rangefinder
- (3) Y-axis end beams are equipped with buffer machinery for collision avoidance
- (4) Control systems divide their work areas

Our Service

Priority On-call

Regardless of which party is responsible

We will never shift the blame or argue

We send workers unconditionally

We will provide on-site maintenance as soon as possible and at
the fastest speed possible

We will do our best to repair it in the shortest possible time and
reduce downtime

Make material handling safer and easier
